

New features & improvements

ICYMI, your passkeys got a security upgrade. ✨ Read on to learn more, plus review how you log in to Dashlane and discover a new feature that will make your life easier when someone asks for the Wi-Fi password.

Securing passkeys with confidential computing

Your passkeys are safer with Dashlane's secure cloud storage, powered by AWS Nitro Enclaves.

Dashlane News

- 🔑 Need to update your Dashlane login email? Maybe your name changed, or maybe you're no longer the person you were when you created "sparkle_pony@cringecloud.com." Whatever it is, we've got you: [Here's how to change the email address you use to log in to Dashlane.](#)
- 👤 Speaking of logging in, if you use "app.dashlane.com" or "console.dashlane.com" in your computer browser, you'll need to install Dashlane Smart Extension next time you access your vault. We're discontinuing direct logins on those sites to prioritize security.
- 👂 Sick of reading your Wi-Fi password out to anyone who needs it? Open a QR code instead and let their phones do the work with Dashlane's new Wi-Fi feature. Save your network details in your vault to try it out.
- 🔍 Send this to your dev and security friends: [Dashlane's web extension code is available for your perusal.](#) (So are our [mobile and command line codebases.](#)) Check out the repos if you want to see how the sausage is made.
